HOW TO MAKE SHADOW PUPPETS!

Shadow PUPPETS

Got light, a wall, and a free hand or two? It doesn't even have to be fancy: sunshine will do!

Shadow puppets can be made with your hands or you can create tricky ones out of paper. By holding your hands or paper in front of a light source in front of a blank area, the shadow will create an image.

Here are some ways you can make shadow puppets with your hands, or if you have some scissors, sticks and card you can design and cut out your very own shadow puppet like the T-Rex below!
In Library the 5/6 students have been researching for their Science mini-projects. We have been exploring the non-fiction section to gather information on various science topics.

Grade 5/6 have been investigating the phenomenon of Light and Shadow. The students produced some incredible shadow puppets and performed a short monologue for one another in class.
