Can you guess the Science items and concepts 3/4LH and 3/4 IN are describing???
Can you guess?

What am I?
I do not look like anything because I am invisible. You cannot see me. Without me you would not be alive. I feel like nothing I live in side of you. I do not sound like anything I am all around you. I can see you but can you see me... I am not a ghost and I am all around the world. You would not be able to survive in space without me.

What am I?

by Jasmine Daniels

You can see me but am I really, really there?
I am made of any pictures and laser beams.
I can be clever and I can look like you!
I feel like smellily, silver, smoke and I sent of am...
I can be scary but can I scare you like an bat that is going to die.
I can be made into anything I want to, like an animal or monster or pop star.
My angle can change if you make me too...
I can't move or speak unless you make me.
You can walk through me but I'm no ghost.
I am very rare to see but you can take picture of me.

What am I?

AIR

GAS
