

**Term 2 2019**

*Ben tornati* (welcome back) for the start of Term 2 Italian. This term students will be learning about caring for their environment.

### **PREP**

This Preps will work on introducing themselves, counting, the days of the week and food. We will read *'The Hungry Caterpillar'* story in Italian and complete many fun activities associated with the book. We will also look at the topic of sustainability and learn about waste and recycling.

### **GRADES 1&2**

In Grades 1&2 students will be working on the topics: 'The world around me' & 'Sustainability.' They will learn about the elements and produce posters about protecting our world.

### **GRADES 3&4**

In Grades 3&4 students will explore the way people around them reduce, reuse and recycle. They will learn about the impact of plastic on our environment and try to find alternatives. Students will also observe and record how recycling is done in their home.

### **GRADES 4-6**

In Grades 4-6 students will be given the opportunity to develop language that allows them to describe the environment they live in. They will design and develop an advertisement with a clear message about caring for the environment.

### **BELLA LINGUA**

The Italian extension group will explore this Term's topic in more detail. They will go on to produce a short narrative about the state of our world today.

I look forward to seeing students gain a deeper understanding of how the issues affecting our environment have an impact on all people globally.

**Signora Rina Nanos ( Lote Italian Teacher)**
